

@audience — model import

Appears in: **DL-07**

agents/audience.py:3

"mistral:7b for everything else." ... footnote ¹ (same as above)

@audience — model import

agents/audience.py:3-3

```
3 from config import OLLAMA_URL, OLLAMA_FAST_MODEL as OLLAMA_MODEL
```

What it shows: The audience agent aliases OLLAMA_FAST_MODEL (mistral:7b) — kept on the structured model for JSON-schema reliability. (Same import in agents/cta_optimizer.py:4 and agents/assistant.py:3.)
