373         <div class="slider-row-label">
374           <span>Formality</span>
375           <span class="slider-val" id="formality-label">Balanced</span>
376         </div>
377         <div class="slider-endpoints">
378           <span>Casual</span>
379           <input type="range" id="slider-formality" min="1" max="5" value="3" />
380           <span>Formal</span>
381         </div>

```

...

templates/result.html:392-393

```
392     <div class="rp-routing">
393       <span class="routing-text" id="routing-text">Planner &rarr; Output</span>

```

...

templates/result.html:471-489

```
471     // — Proactive suggestion on load —————
472     window.addEventListener('DOMContentLoaded', () => {
473       // Init slider labels
474       toneLabel.textContent      = TONE_LABELS[sliderTone.value];
475       ageLabel.textContent       = sliderAge.value;
476       formalityLabel.textContent = FORMALITY_LABELS[sliderFormality.value];
477
478       // Fire-and-forget suggestion fetch
479       fetch('/suggest', {
480         method: 'POST',
481         headers: { 'Content-Type': 'application/json' },
482         body: JSON.stringify({ output: outputState }),
483       })
484       .then(r => r.ok ? r.json() : null)
485       .then(data => {
486         if (data && data.message) appendMessage('assistant', data.message);
487       })
488       .catch(() => {}); // silently ignore
489     });

```

...

templates/result.html:502-538

```
502     async function triggerRefine() {
503       const userMsg = document.getElementById('chat-input').value.trim();
504       if (userMsg) appendMessage('user', userMsg);
505       document.getElementById('chat-input').value = '';
506
507       appendThinking();
508       setLoading(true);
509
510       try {
511         const resp = await fetch('/refine', {
512           method: 'POST',
513           headers: { 'Content-Type': 'application/json' },
514           body: JSON.stringify({
515             output_state: outputState,
516             user_message: userMsg,
517             tone:         parseInt(sliderTone.value),
518             age:           parseInt(sliderAge.value),
519             formality:     parseInt(sliderFormality.value),
520             chat_history: chatHistory.slice(-6),
521           }),
522         });
523       } catch {}
524
525       if (!resp.ok) throw new Error(`HTTP ${resp.status}`);
526       const data = await resp.json();
527
528       removeThinking();
529
530       // Update routing label
531       const routingEl = document.getElementById('routing-text');
532       if (routingEl) routingEl.textContent = data.routing_label || 'Planner \u2192 Output';
533
534       // Update in-memory state for next round-trip
535       outputState = data.output;
536
537       // Update DOM sections
538       updateDOM(data.output);

```

What it shows: The two-column refinement page: sliders update labels instantly with no server call, the routing label renders after each refine, and a proactive /suggest fires on load.
