

@copywriter — model import

Appears in: **DL-07**

agents/copywriter.py:3

"gemma4:e2b for the copywriter only." ... footnote ¹ — "the constants live in @config and are used by @copywriter, @audience, and @assistant."

@copywriter — model import

agents/copywriter.py:3-3

```
3  from config import OLLAMA_URL, OLLAMA_MODEL
```

What it shows: The copywriter imports OLLAMA_MODEL (gemma4:e2b) — the only agent on the creative model, chosen for expressive range.
